## DETAILED ACTION

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1, drawn to a method for methanol steam reforming using a catalyst comprising palladium on zinc oxide, classified in class 423, subclass 648.1.
  - II. Claims 2-4, drawn to a fuel processing system, classified in class 422, subclass 188.
  - III. Claim 5, drawn to a method for alcohol steam reforming with a catalyst comprising palladium or ruthenium on cerium-promotes zirconia or alumina, classified in class 423, subclass 648.1.
  - IV. Claims6 -7, drawn to a method for alcohol steam reforming with a catalyst comprising a palladium-ruthenium alloy on zirconia or alumina, classified in class 423, subclass 648.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced with a materially difference apparatus such as having a reactor and a hydrogenator. Note that the fuel cell of the apparatus of claims 2-4 is not required to practice the method of claim 1

Art Unit: 1754

- 3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation since both processes require different catalyst compositions.
- 4. Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation since both processes require different catalyst compositions.
- 5. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different effects since the process require a different catalyst composition as that of the reactor and since the process as claimed does not require a fuel cell.
- 6. Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different effects since the process require a different catalyst composition as that of the reactor and since the process as claimed does not require a fuel cell.

Art Unit: 1754

- 7. Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation since both processes require different catalyst compositions.
- 8. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II; the search required for Group I is not required for Group III; the search required for Group IV; the search required for Group II is not required for Group III; the search required for Group III is not required for Group IV; and the search required for Group III is not required for Group IV restriction for examination purposes as indicated is proper.
- Applicant is advised that the reply to this requirement to be complete must include an
  election of the invention to be examined even though the requirement be traversed (37 CFR
  1.143).
- 10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Conclusion

- 11. During an inspection of the application file, it was noted that the Form PTO 1449 of the IDS filed on 8/15/01 is missing from the file. The Applicants are invited to submit a copy of the Form.
- 12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maribel Medina whose telephone number is (571) 272-1355. The examiner can normally be reached on Monday through Friday from 7:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on (571) 272-1358. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-0994.
